Summary

As a fresh front-end developer, I specialize in creating dynamic and user-friendly web applications with React. With a strong foundation in JavaScript, HTML, and CSS, I focus on delivering seamless user experiences. I'm passionate about learning new technologies and eager to contribute to innovative projects while refining my skills in modern web development.

Projects

- **E-Commerce Web Application (Vanilla JS)**
  Developed a fully functional and Responsive e-commerce platform without using any JavaScript or CSS frameworks. The application includes comprehensive features like user login, account creation, and a detailed admin dashboard. The admin can manage the product catalog by adding, removing, and controlling the display of products on the product page. The platform also includes options for updating passwords, managing images, and more.
  [Live Demo E-commerce App](#)
- **React To-Do List App**
  Developed a dynamic to-do list application using React, integrating Material-UI (MUI) for styling and design. The app utilizes popular hooks like useReducer, useState, useContext (as a provider), useMemo, and useEffect. Users can add, edit, remove, and check tasks, with status pop-ups for actions such as task editing, deletion, and completion.
  [Live Demo React Todo List](#)
- **Weather App (React)**
  Created a React-based weather app with Material-UI (MUI) and Next.js 18 for internationalization. Features include language switching between Arabic and English, with dynamic layout direction adjustment.
  [Live Demo Weather App](#)
- **Image Search Application**
  Built a responsive image search app , Users can search for high-quality images and download them directly. The app is optimized for all devices.
